

Starting from Windows

1. Close all open documents
2. Double-click on **start.bat** for automatic starting (will ask for Admin-Authentication!)

start_manual.bat will allow you to choose

USB HDD / Removable Device / Manufacturer of Stick / ...

Some devices need Secure Boot to be configured to allow "Microsoft 3rd Party CA":

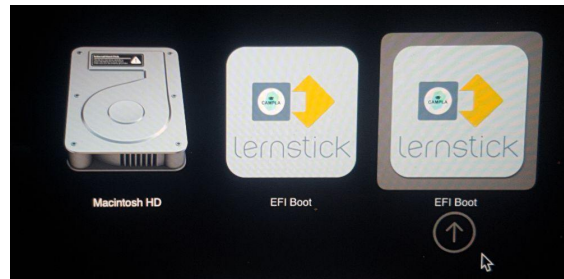

1. Run **bitlocker-keys.bat**, use your phone to take a photo of your 40-character-long key(s) if shown! (will ask for Admin-Authentication!)

2. Run **start_manual.bat**, choose "Troubleshooting/Advanced options" and **"UEFI Firmware Settings"** (see [manual](#)).

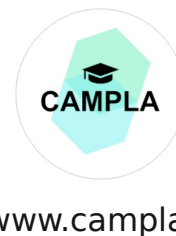

Starting Intel Macs (until 2020)

Hold **option** , start your laptop and choose the rightmost Lernstick-Logo

For Intel Macs with T2-Security-Chip (2018-20), start once with **cmd**  + **R** and allow non-Apple Operating Systems to be booted from external media (see [manual](#)).

Starting Apple Silicon Macs*

* currently M1/M2-Chips supported, Lernstick CUSTOM or CAMPLA needed!

Start computer and keep holding the **power button** until text changes, choose Lernstick-Logo

One-time preparation:

Launch App supplied to you and/or follow the [installation-manual](#))
